

Marcus Vance

Backend & Distributed Systems Developer

marcus.vance@backenddev.io · +1 206 555 8921 · Seattle, WA, USA

SUMMARY

Backend specialist focused on high-throughput distributed systems, event-driven architectures, and robust API design.

SKILLS

Python · Go · PostgreSQL · Kafka · AWS · Docker

EXPERIENCE

Backend Engineer — Cascade Tech

2020-02 – Present

- Designed and built event-driven services using Python, FastAPI, and Apache Kafka.
- Scaled database clusters to handle a 300% increase in transactional volume without downtime.
- Participated in on-call rotations, quickly troubleshooting and resolving production incidents.

Software Developer — Pacific Software Labs

2017-08 – 2020-01

- Developed core billing and subscription services using Python and PostgreSQL.
- Wrote comprehensive unit and integration tests to ensure 90%+ code coverage.
- Collaborated with product managers to scope technical feasibility for new features.

EDUCATION

Bachelor of Science in Informatics

2017

University of Washington
