

Lucas Silva

Software Engineer & Data Enthusiast

lucas.silva@devmail.com.br · +55 11 98765 4321 · São Paulo, Brazil

SUMMARY

Software engineer with a strong foundation in backend development, data processing pipelines, and modern web frameworks.

SKILLS

Python · Django · React · PostgreSQL · Docker · Redis

EXPERIENCE

Software Engineer — Samba Tech

2020-03 – Present

- Built scalable web applications using Python and Django REST framework.
- Implemented caching strategies with Redis to reduce database load by 40%.
- Contributed to frontend features using React and modern CSS modules.

Junior Backend Developer — Paulista Solutions

2017-02 – 2020-02

- Developed automated data ingestion scripts using Python and pandas.
- Maintained relational database schemas and wrote optimized SQL migrations.
- Assisted in deploying applications to cloud environments using Docker containers.

EDUCATION

Bachelor of Science in Software Engineering

2016

Universidade de São Paulo (USP)
