

Lucas Van Der Berg

DevOps & Cloud Infrastructure Engineer

lucas.vanderberg@cloudscale.nl · +31 20 555 0188 · Amsterdam, Netherlands

SUMMARY

Reliability-focused DevOps Engineer with extensive experience in cloud architecture, CI/CD automation, and Kubernetes orchestration. Dedicated to maintaining high availability and secure infrastructure.

SKILLS

AWS · Kubernetes · Terraform · Docker · Python · CI/CD · Linux

EXPERIENCE

Senior DevOps Engineer — Nordic Cloud Services

2020-09 – Present

- Provisioned and managed multi-region AWS infrastructure using Terraform and Ansible.
- Optimized Kubernetes cluster performance and automated deployment pipelines using GitHub Actions.
- Conducted security audits and vulnerability assessments, ensuring 100% compliance with GDPR standards.

Systems Administrator — Dutch Tech Innovators

2017-04 – 2020-08

- Managed Linux servers and internal networking infrastructure with zero unplanned downtime.
- Automated routine maintenance and backup tasks using Python and Bash scripting.
- Provided tier-3 technical support for critical production incidents and system failures.

EDUCATION

Bachelor of Science in Software Engineering

2017

Delft University of Technology
