

Elena Rostova

Machine Learning Engineer & Python Developer

elena.rostova@example.com · +44-20-7946-0912 · London, United Kingdom

SUMMARY

Data-focused engineer with extensive experience in developing production-grade machine learning models, NLP pipelines, and scalable Python architectures.

SKILLS

Python · PyTorch · TensorFlow · Scikit-Learn · SQL · AWS · MLOps

EXPERIENCE

Machine Learning Engineer — Aether AI

2021-01 – Present

- Designed and trained transformer-based NLP models for automated document classification using PyTorch.
- Deployed models into production environments utilizing AWS SageMaker and Docker containers.
- Established MLOps pipelines using MLflow to track model experiments, datasets, and performance metrics.

Data Scientist — QuantEdge Analytics

2019-02 – 2020-12

- Performed exploratory data analysis and built predictive churn models using Python and Scikit-Learn.
- Communicated complex statistical insights and predictive trends directly to executive leadership stakeholders.
- Automated ETL processes with custom Python scripts, reducing manual reporting time by 15 hours per week.

EDUCATION

Master of Science in Artificial Intelligence

2019

Universitat Politècnica de Catalunya (UPC)

Bachelor of Science in Applied Mathematics

2017

Lomonosov Moscow State University
