

Aarav Sharma

DevOps & Cloud Infrastructure Engineer

aarav.sharma@example.com · +1-415-555-8910 · Seattle, WA

SUMMARY

Infrastructure automation enthusiast with a strong background in container orchestration, cloud migration, and implementing robust CI/CD pipelines.

SKILLS

Kubernetes · Docker · Terraform · AWS · Python · Jenkins · Linux

EXPERIENCE

Senior DevOps Engineer — CloudScale Global

2020-04 – Present

- Managed multi-region AWS cloud infrastructure using Terraform and Infrastructure as Code principles.
- Orchestrated Kubernetes clusters across production and staging environments supporting high-traffic microservices.
- Implemented automated monitoring and alerting systems using Prometheus and Grafana, lowering incident response time.

Systems Administrator — NexGen Technologies

2017-08 – 2020-03

- Maintained and secured Linux-based server fleets ensuring 99.99% uptime for core enterprise applications.
- Wrote custom automation scripts in Python and Bash to streamline server provisioning and backups.
- Collaborated with security teams to execute vulnerability scans and patch management protocols.

EDUCATION

Bachelor of Science in Information Technology

2017

University of Washington
