

Liam O'Connor

Backend Engineer | Python & Microservices

liam.oconnor@example.ie · +353-1-496-0123 · Dublin, Ireland

SUMMARY

Dedicated Backend Engineer experienced in designing robust server architectures, secure RESTful APIs, and efficient data processing pipelines.

SKILLS

Python · Django · FastAPI · PostgreSQL · Redis · Docker · AWS

EXPERIENCE

Software Developer — Emerald Software Labs

2020-01 – Present

- Designed and implemented high-performance backend services using Python and Django REST Framework.
- Optimized complex SQL queries and database indexing strategies, reducing query latency by nearly 50%.
- Integrated Redis caching layers to handle surges in traffic during peak financial transaction hours.

Junior Software Engineer — Dublin Tech Solutions

2018-06 – 2019-12

- Assisted in refactoring legacy codebase into modular microservices written in Python.
- Participated in code reviews and wrote automated regression tests using pytest.
- Configured and maintained CI/CD workflows using GitHub Actions.

EDUCATION

Bachelor of Arts in Computer Science

2018

Trinity College Dublin
