

Mei Lin

Data Engineer & Analytics Specialist

mei.lin@example.com · +1-212-555-3849 · New York, NY

SUMMARY

Detail-oriented Data Engineer with a strong foundation in building large-scale data warehouses, streaming pipelines, and optimizing ETL processes.

SKILLS

Python · SQL · Apache Spark · Kafka · Snowflake · AWS · Airflow

EXPERIENCE

Data Engineer — Wall Street Data Corp

2019-10 – Present

- Built and maintained scalable ETL pipelines processing terabytes of financial data daily using Apache Spark and Python.
- Migrated on-premise data warehouses to Snowflake cloud architecture, improving query performance significantly.
- Orchestrated complex workflow dependencies using Apache Airflow with automated alerting hooks.

Junior Data Analyst — Metro Analytics

2017-07 – 2019-09

- Wrote advanced SQL queries to extract, transform, and analyze user behavioral datasets.
- Created automated Tableau dashboards for executive reporting and operational KPIs.
- Collaborated with data scientists to clean and prepare feature sets for machine learning models.
