Mei-Ling Zhou

DevOps & Cloud Infrastructure Engineer

meiling.zhou@example.com · +1 415 555 2671 · San Francisco, CA, USA

Summary

Reliable DevOps Engineer focused on automating deployment pipelines, containerization, and cloud infrastructure optimization. Expert in AWS, Kubernetes, and infrastructure-as-code principles.

Skills

AWS · Kubernetes · Terraform · Docker · Python · CI/CD · Linux

Experience

Senior DevOps Engineer — CloudScale Systems

2019-11 – Present

- Managed and scaled AWS cloud infrastructure supporting microservices serving millions of global users.
- Automated infrastructure provisioning using Terraform and Ansible, reducing deployment setup time by 70%.
- Implemented rigorous security scanning and compliance checks within automated CI/CD pipelines.

Systems Administrator — Silicon Valley Tech

2017-02 – 2019-10

- Maintained Linux server environments, ensuring 99.99% uptime for core company applications.
- Containerized legacy monolithic applications using Docker for smoother cloud migration.
- Wrote automation scripts in Python to streamline daily backup and monitoring tasks.

Education

Bachelor of Science in Electrical Engineering and Computer Sciences

University of California, Berkeley · 2017
