Gabriel Santos

Backend & Cloud Systems Engineer

gabriel.santos@example.com · +55 11 98765-4321 · São Paulo, Brazil

Summary

Backend specialist focused on high-throughput distributed systems and cloud architecture. Adept at designing fault-tolerant services using modern programming languages and relational databases.

Skills

Python · Go · FastAPI · PostgreSQL · Redis · Docker · AWS

Experience

Backend Software Engineer — Amazonia Tech

2020-04 – Present

- Built high-performance asynchronous APIs using Python, FastAPI, and Redis for caching.
- Migrated heavy database transactions to PostgreSQL, achieving a 40% reduction in query latency.
- Collaborated across international teams to design secure and scalable authentication services.

Software Developer — Paulista Solutions

2017-01 – 2020-03

- Developed core features for financial transaction software using Python and Django.
- Participated in agile ceremonies, code reviews, and architectural planning sessions.
- Implemented comprehensive unit and integration testing suites to minimize production bugs.

Education

Bachelor of Science in Computer Engineering

Universidade de São Paulo (USP) · 2016
