Mei Lin

DevOps & Cloud Automation Engineer

mei.lin@example.com · +1 415 555 2671 · San Francisco, CA, USA

Summary

Reliability-focused DevOps engineer specializing in infrastructure as code, Kubernetes orchestration, and cloud security.

Skills

Terraform · AWS · Kubernetes · Docker · Python · CI/CD

Experience

DevOps Engineer — Silicon Valley Cloud

2021-05 – Present

- Provisioned multi-region AWS infrastructure using Terraform and Ansible.
- Managed Kubernetes clusters hosting mission-critical microservices with 99.99% uptime.
- Implemented automated security scanning in CI/CD pipelines to catch vulnerabilities early.

Systems Administrator — Pacific Software

2018-03 – 2021-04

- Maintained Linux server fleets and automated routine patching tasks using Bash scripts.
- Configured monitoring and alerting systems using Prometheus and Grafana.
- Assisted development teams with troubleshooting staging and production deployment issues.

Education

Bachelor of Science in Electrical Engineering and Computer Sciences

University of California, Berkeley · 2018
