Elena Rostova

Machine Learning Engineer

elena.rostova@example.com · +1-555-839-2011 · Boston, MA

Summary

AI researcher and ML Engineer focused on deep learning, natural language processing, and robust Python-based model deployment.

Skills

Python · PyTorch · TensorFlow · NLP · AWS · MLOps · SQL

Experience

Machine Learning Engineer — NeuralMind AI

2021-07 – Present

- Trained and fine-tuned large language models using PyTorch on distributed GPU clusters.
- Deployed production-ready ML models as scalable microservices using Python, FastAPI, and Docker.
- Reduced model inference latency by 50% via quantization and TensorRT optimization.

Data Scientist — Cognitive Data Labs

2019-06 – 2021-06

- Developed predictive customer churn models using scikit-learn and gradient boosting algorithms.
- Cleaned and preprocessed large-scale datasets with Python and Pandas.
- Presented analytical insights and model performance metrics to executive stakeholders.

Education

Master of Science in Artificial Intelligence

Massachusetts Institute of Technology · 2019

Bachelor of Science in Mathematics

Boston University · 2017
