Javier Gomez

DevOps & Cloud Engineer

javier.gomez@example.es · +34-633-987-654 · Barcelona, Spain

Summary

Infrastructure specialist with extensive background in Kubernetes, Terraform, AWS, and modern CI/CD automation pipelines.

Skills

AWS · Kubernetes · Docker · Terraform · Python · Jenkins · Linux

Experience

Senior DevOps Engineer — CloudScale Europe

2020-02 – Present

- Implemented infrastructure as code (IaC) using Terraform across multiple AWS regions.
- Managed production Kubernetes clusters handling over 50 million monthly requests.
- Automated CI/CD workflows using GitHub Actions and Jenkins, cutting deployment times in half.

Systems Administrator — Barcelona Systems

2017-09 – 2020-01

- Maintained Linux server environments and ensured 99.9% uptime across all core services.
- Wrote automation scripts in Python and Bash to streamline routine system backups.
- Troubleshoot network anomalies and security vulnerabilities proactively.

Education

Bachelor of Science in Telecommunications Engineering

Universitat Politècnica de Catalunya (UPC) · 2017
