Summary

Data Engineer with profound experience in building robust data pipelines, ETL processes, and large-scale data warehouses using Python and Spark.

Skills

Python · Apache Spark · SQL · Snowflake · Airflow · AWS · Kafka

Experience

Senior Data Engineer — Metro Analytics

2021-05 – Present

- Designed and maintained scalable ETL pipelines processing tens of gigabytes daily using Apache Airflow and Python.
- Integrated streaming data sources with Apache Kafka and loaded transformed data into Snowflake data warehouse.
- Partnered with data science teams to prepare clean datasets for advanced analytics models.

Data Analyst — Gotham Tech

2018-09 – 2021-04

- Wrote complex SQL queries and stored procedures to extract business intelligence insights.
- Automated routine reporting tasks utilizing Python scripts and pandas.
- Created executive dashboards visualizing core business KPIs.

Education

Bachelor of Science in Statistics and Data Science

New York University · 2018
